

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

30 Day Public Notice Report

Application # : FW-24868

Stream : Carpentier Creek

Applicant : Leisure Land LLC
Brent A Holweger
9500 Hillview Drive
Evansville, IN 47720-7886

Description : A 2.41 acre area (approximately 250' x 550') will be filled in the east floodplain of Carpentier Creek. The fill will vary in depth from 12' on the landward side to approximately 0' on the streamward side. The fill will be set 1000' back from the top of the bank. Details of the project are contained in information received electronically at the Division of Water on June 3, 2008 and in plans and information received at the Division of Water on June 9, 2008 and July 2, 2008.

Location : Beginning 350' east and 2000' south of the Broadway Avenue stream crossing and extending 430' east and 500' south

at Evansville, Perry Township, Vanderburgh County
S½, NE¼, SE¼, Section 34, T 6S, R 11W, Evansville South, IN-KY Quadrangle

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24878

Stream : Great Miami River

Applicant : Tom Jeffery
6800 Landstar Drive
Louisville, KY 40272-4789

Description : Fill is proposed in the floodway to create a finished elevation of 490' NGVD to allow for commercial development. The fill will be approximately 22' above the existing grade on the landward side and will slope to existing grade on the streamward side with 2.5:1 sideslopes. The fill will extend a maximum of 400' from the floodway and will be set 2,500' back from the top of the bank. Fill material will be fly ash capped with borrowed top soil from under the fill site. Details of the project are contained in information and plans received at the Division of Water on June 12, 2008.

Location : Approximately 300' north and 695' east of the US Route 50 and State Route 1 intersection and extending approximately 1200' east and 670' south east
DOWNSTREAM: near Lawrenceburg, Lawrenceburg Township, Dearborn County

30 Day Public Notice Report

Application # : FW-24885

Stream : Unnamed Tributary East
Fork Whitewater River

Applicant : Wayne County Board of Commissioners
Andrew J Wortkoetter
401 East Main Street
Richmond, IN 47374-4237

Description : The existing 4.9' x 14' x 39' single span concrete structure carrying Liberty Avenue over the stream will be replaced with a new culvert system to reduce upstream flood damages. The new crossing will consist of a 8' x 20' x 75' long three sided culvert. A pilot channel with flowline elevation 853.06 and 20:1 slopes will be provided through the culvert. The total length of the project will be 1078' along Liberty Avenue. The proposed roadway will consist of two 11' travel lanes, two useable shoulders a minimum 5' wide with 3' paved. Details of the project are contained in information and plans received at the Division of Water on June 17, 2008 and July 3, 2008.

Location : At the Liberty Ave stream crossing, approximately 700' upstream of the confluence with East Fork Whitewater River
near Richmond, Wayne Township, Wayne County

30 Day Public Notice Report

Application # : FW-24889

Stream : Yellow Fork

Applicant : New Albany-Floyd County Consolidated School Corporation
Bill Wiseheart
2813 Grant Line Road
New Albany, IN 47150-2457

Description : A new pedestrian bridge spanning the creek will be built over Yellow Fork. The new bridge will allow access between Floyd Central High School Athletic fields. The new structure will be a single span prefabricated bridge with span length of 60'. The structure will have an out to out length of 60' and a clear width of approximately 7'. The abutments will be built outside the limits of the channel. No work is proposed within the channel banks. The approach paths will be elevated a maximum of 6" above the existing grade. Details of the project are contained in information and plans received at the Division of Water on June 18, 2008.

Location : Approximately 400' upstream of the Yellow Fork confluence near Galena, Greenville Township, Floyd County

30 Day Public Notice Report

Application # : FW-24911

Stream : Rattlesnake Creek

Applicant : Roach Family Farms LLC
Joseph A O'Donnell
11974 N 1000 W
Monticello, IN 47960-8005

Description : Approximately 195' of Rattlesnake Creek's eroded north and east streambank will be stabilized with riprap to protect the bank from further erosion. The riprap will be keyed into the streambed at its base and will conform to the existing bank at the project limits. It will have a maximum height of 4', a maximum streamward projection of 2' beyond the existing bank, and (varies 2 to 4):1 sideslopes. The stream bank downstream of the stabilized area will be smoothed and shaped to facilitate maintenance. Details of the project are contained in information received electronically at the Division of Water on July 3, 2008 and in plans and information received at the Division of Water on

Location : At the intersection of County Road 925 West and County Road 1200 North between County Roads 925 West and 900 West.

30 Day Public Notice Report

Application # : FW-24912

Stream : Little Pine Creek

Applicant : Louise C Gillen
Larry G Gillen
11626 East State Road 18
Fowler, IN 47944-8528

Description : The grass waterway will be reconstructed upstream of the initial open water portion of Little Pine Creek. The project will commence approximately 1,300' west of County Road 1200 East (County Line Road between Benton and White Counties) and 0.5 miles south of Indiana State Road 18 and will terminate at approximately 975' of the location of its commencement. An average of 0.5' to 1.0' of material will be removed from the ditch to create a 18' bottom width, 8:1 sideslopes, and a 0.2% bottom slope along the western 500' of the project and a 0.6% bottom slope along the 475' remainder of the project length. The excavated material will be sidecast and graded on the adjacent agricultural land to a maximum depth of approximately 6" to fill eroded areas. Approximately 4,171 square yards of erosion control blanket/mulch netting will protect susceptible areas and a total of 1.3 acres will be seeded. Details of the project are contained in information received electronically at the Division of Water on July 8, 2008 and in plans and information received at the Division of Water on

Location : Approximately 1,300' of the east edge of Section 21 (County Line Road between Benton and White Counties) where the grass waterway jogs to the northwest and continues to the end of the project at a location directly east of the location of commencement by a distance of 975'
near Raub, Pine Township, Benton County
Section 21, T 25N, R 6W

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24916

Stream : Big Blue River

Applicant : Crawford County Commissioners
Larry Bye
PO Box 316
Crawford County Courthouse
English, IN 47118-0316

Description : The existing steel truss bridge carrying Main Street over the Blue River will be replaced with a new structure immediately upstream (east) of the existing bridge. The existing span is a one-lane bridge and will be replaced with a two lane structure to aid traffic flow in the center of the town. The proposed structure will be a Contech Steadfast steel truss bridge with a total span of 180', made up with a main span of 140' over the river and a secondary span of 40' over a portion of overbank in the floodplain. It will have an out-to-out length of 181.4' and a clear roadway width of 29'. New abutments will be built adjacent to the existing abutments. The north abutment will be demolished, and the south abutment will remain as a retaining wall adjacent to the new structure. A new pier will be built next to the existing pier on the north bank. The proposed bridge will span the river without a pier in the channel, unlike the existing bridge. The two existing piers will be demolished. The existing bridge has an 8" gravity sewer line and an 8" water main hung on the downstream face, and a 6" sewer force main and 4" gas main hung on the upstream face. These lines will be rebuilt on the downstream face of the proposed bridge to protect them from debris when floodwaters are high. Details of the project are contained in information received electronically at the Division of Water on July 9, 2008 and in plans and information received at the Division of Water on

Location : At the Main Street bridge crossing in Milltown, between Whiskey Run Township, Crawford County, and Blue River Township, Harrison County.

30 Day Public Notice Report

Application # : FW-24917

Stream : White Lick Creek

Applicant : Opus North Corporation
Ryan Albright
10333 N Meridian Street, Suite 130
Indianapolis, IN 46290-1132

Description : The project scope consists of the excavation of a swale to draw a wetland mitigation/floodplain compensatory storage area. There is no proposed filling within the floodway, only cut. The swale acts as a conveyance for flood waters to and from the White Lick Creek. The necessity for this project is to provide a conveyance for relief of the flood waters associated with the White Lick Creek. The conveyance is a trapezoiden swale that has a 20' bottom width, 5:1 side slope and a longitudinal slope of 0.20%. The downstream outlet invert is set at 937.10' which is the elevation of the normal high water mark found on the downstream bridge under State Road 267 approximately 300' east of the swale outlet point. The wetland mitigation/floodplain compensation was necessary for the new construction of the Whitestown Business Center north of White Lick Creek. Details of the project are contained in information received electronically at the Division of Water on July 10, 2008 and in plans and information received at the Division of Water on

Location : The swale discharges to the White Lick Creek from the south side. The discharge point is approximately 300' west of State Road 267 near Whitestown, Perry Township, Boone County Section 27, T 18N, R 1E, Fayette Quadrangle Quad Code: 3908684

Application # : PL-21088

Lake : Bruce Lake

Applicant : Lake Bruce Conservancy District
Norman Steigely, Chair/Secretary
P O Box 97
Kewanna, IN 46939-0097

Description : Five separate areas are proposed for hydraulic dredging. All areas will be dredged to depths varying from 1' - 7' below the legal lake level or to the original bottom whichever is shallower and uniformly sloped to the existing legal shoreline. All dredged spoils will be pumped to an upland contained disposal facility with no direct run off back to the lake. Area A is 3.6 acres located adjacent to the outlet of the lake on the northwest side and ranges from 40' wide to approximately 400' wide and 1300' long. An average of 5.7' of accumulated muck and debris will be dredged to reach the original lake bottom. Area B is 2.3 acres located on the west end of the lake and is approximately 80' wide by 700' long. An average of 5.1' of accumulated muck and debris will be dredged to reach the original lake bottom. Area C is an existing 50' wide channel along 1200' of the southern shoreline with a total area of 0.9 acres. An average of 3.7' of accumulated muck and debris will be maintenance dredged to the original bottom. Area D consists of three man-made channels on the eastern shoreline. Each channel is approximately 0.3 acres with an average width of 35' and an average length of 300'. The channels will be dredged to a maximum depth of 8' in the center or original bottom whichever is shallower and sloped uniformly to the channel edges. Sediment depth in the channels ranges from 1.2' to 6.6'. Area E is 0.6 acres at the outlet of Overmyer Ditch in the northeast corner of the lake. The existing ditch outlet area is 60' wide and 300' long. The average depth of sediment to be removed is 2.4' with a maximum removal depth of 5.5' to the original lake and channel bottom. Details of the project are contained in information and plans received at the Division of Water on June 26, 2008 and June 27, 2008.

Location : Area A is adjacent to the outlet of the lake on the northwest side; Area B is located on the west end of the lake; Area C is an existing channel along the southern shoreline; Area D consists of three man-made channels on the eastern shoreline of Lake Bruce; Area E is at the outlet of Overmyer Ditch in the northeast corner of the lake
